

Unified Roaming Solution & eSIM Hub

Seamless Mobility. Controlled Costs. Monetised Roaming.

Unified Roaming and eSIM Enablement—built for how modern operators scale global mobility

Unified Roaming Solution

Simplify Roaming. Improve Margins. Scale with Confidence.

Roaming should drive margin and customer loyalty—not operational complexity. Omobio's Unified Roaming Solution consolidates steering, interconnect, analytics, assurance, and automation into a single GSMA-compliant platform—giving operators real-time visibility, tighter commercial control, and measurable revenue uplift across inbound and outbound roaming.

Built for live networks. Proven at scale.

Unified Roaming Capabilities

Value-Added Services

Billing and Mediation

Integrated Firewall

Revenue and Fraud Management

AI-Enabled Use Cases

Our Value Proposition

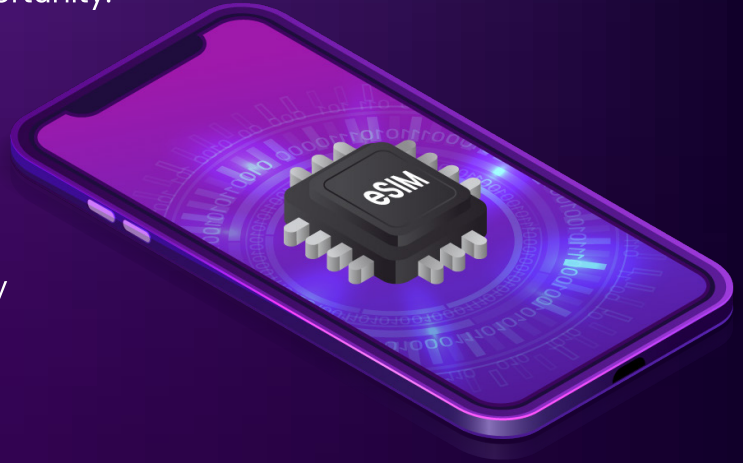

One Platform. Full Control. Real Results.

- ✓ 10–12% uplift in roaming revenue
- ✓ 1 license covering 2G to 5G, IoT/M2M, and eSIM
- ✓ GSMA-aligned testing, compliance & automation
- ✓ Reduce Roaming spent by 45%
- ✓ 1 Platform covering Wholesale, Threat, Fraud, VAS & AI enabled use cases

eSIM Hub

Monetise Digital Connectivity. Own the eSIM Opportunity.

eSIM is reshaping how connectivity is distributed, consumed, and monetised. Omobio's eSIM Hub enables operators to launch, manage, and scale eSIM services across consumer, enterprise, travel, and IoT use cases—using a single, secure, GSMA-aligned platform that integrates seamlessly with roaming and core network ecosystems.

eSIM Hub Capabilities

No SIM Expiry Options

eSIM & Physical SIM Support

Worldwide Multi-Network Connectivity

API-Enabled, No-Code Integration

Integrated Payments & Billing

Built-in Marketing & Growth Tools

Flexible Voice, SMS and Data Bundles

Our Value Proposition

From eSIM Enablement to Revenue Ownership

Faster Time-to-Market

Operator-Owned Commercial Control

One Platform, Multiple Use-Cases

New Digital Revenue Streams

Reduced OTT Dependency

Roaming & Billing Alignment
